Emotion and Others
1. Social functions of emotion (4 levels of analysis)
2. Other-praising emotions
3. Schadenfreude
4. Communal vs. Exchange Relationships
5. Four horsemen of the apocalypse (Gottman’s work)
6. Prosocial function of gratitude and compassion (DeSteno)
7. Relationship between social emotions and moral character (DeSteno)

Emotion Expression
8. Laughter different types, acoustic properties (Bachorowski work)
9. Laughter and social bonds
10. Laughter and negative emotion (undoing hypothesis)
11. Benefits and functions of laughter
12. Factors that influence benefit of crying
13. Function of touch
14. Hertenstein touch study

Cognition and Emotion
15. Affect as information model (Clore)
16. Flash-bulb memories
17. Appraisal Tendency Framework (5 principles and empirical evidence)
18. Processing style (positive vs. negative emotions)

Brain and Emotion
20. Phineas Gage & what we learned from his brain damage
21. Methods to study brain (TMS, fMRI, CT, PET, EEG)
22. Hemispheric asymmetry and emotion
23. Amygdala: what involved in, evidence from studies, patient examples
24. Limbic system
25. Nucleus accumbens
26. Jose Delgado and his study with aggression
27. Theories of Emotion (Wager)

Hormones and Emotion
28. Function and types of hormones
29. Methods for collection of hormones
30. Two experimental methods for manipulating hormones
31. Hormones and stress (HPA axis, cortisol, DHEA)
32. Sex hormones (Testosterone, Oxytocin)
33. Dual-hormone hypothesis

Psychophysiology and Emotion
34. Branches of ANS nervous system
35. Function of SNS and PNS (e.g., eye pupils, heart, vessels, sweat glands)
36. ANS Measurement (e.g., EKG, GSR, respiration, SKT, blood pulse)
37. Vagal tone
38. Emotion specificity
39. Emotion coherence

Emotion Regulation
40. Process model of ER: its components, categories, definitions of strategies, examples
41. Emotion regulation strategies (cognitive reappraisal, suppression, etc.)
42. Suppression vs. reappraisal: short & long-term consequences
43. Social emotion regulation (social baseline theory, emotional synchrony, social sharing)

Unconscious Emotion
44. Id, Ego, Superego
45. Early theorists (Freud, Jung)
46. Korsakoff syndrome
47. Priming studies (mere exposure effect, subliminal emotion faces, bargh warmth study)
48. Unconscious emotion regulation

Emotion and Aging
49. Time perspective and motivation
50. Age-related positivity effect
51. Socioemotional selectivity theory
52. Emotion regulation in older adults
